

Fusion Splice Protector Sleeve

Opterna's fusion splice protector sleeves are transparent plastic tube and stainless steel bar for single fiber protector, designed to prevent stress and protect fusion fiber optic splices in field and factory operation. Two different versions are available, 60mm and 45mm length.

Specification

Sleeves are made of ethylene vinyl acetate (EVA) with heat-activated memory which causes them to shrink under exposure to heat. Sleeves shrink tightly to exclude air and hold the bar firmly, preventing abrasion of delicate glass fibres.

Applications

- ❖ Compatible with all splice sleeve ovens & trays.
- ❖ Applicable for 250/900um fiber size.

Ordering Information

Part Number	Description
PS-CL-45	45mm clear fusion splice protector sleeve
PS-CL-60	60mm clear fusion splice protector sleeve.
Standard Color	Clear is our standard stock range.
Standard packaging	Bags of 50 (or) 100 packaged in an outer labeled bag of 1,000 splices.
